

Intro To Mura 7 Display Objects

Stephen Withington

Director of Training & Events

Mura Display Objects

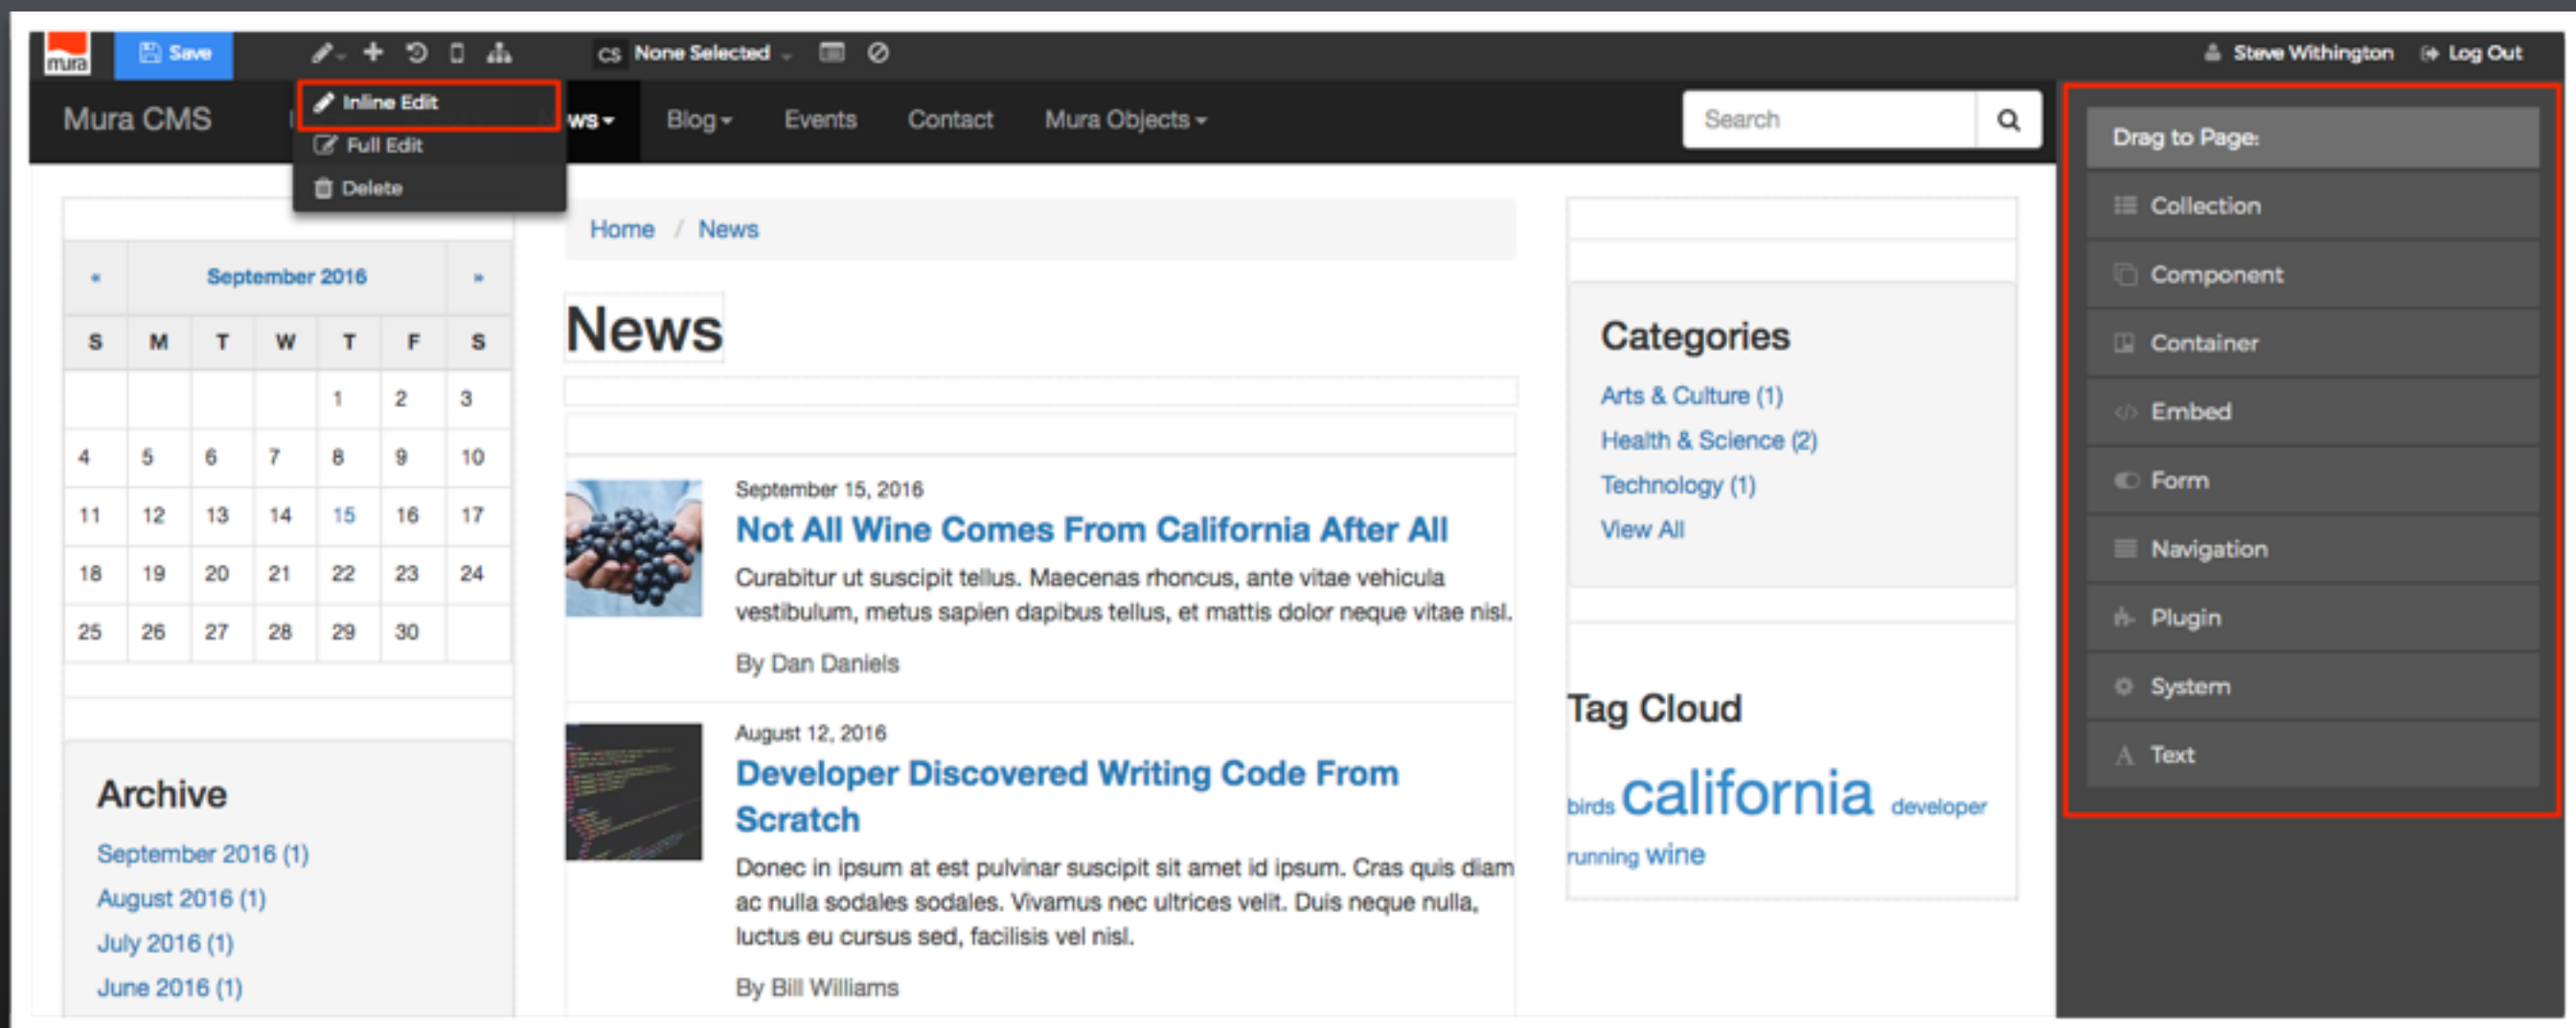

- Self-contained display
 - Portable
 - Distributable (via plugins)

Mura Display Objects

- Self-contained display
 - Portable
 - Distributable (via plugins)
- Could be an entire application!

Mura Display Objects

- Managed via front-end only (*in Mura v7+*)

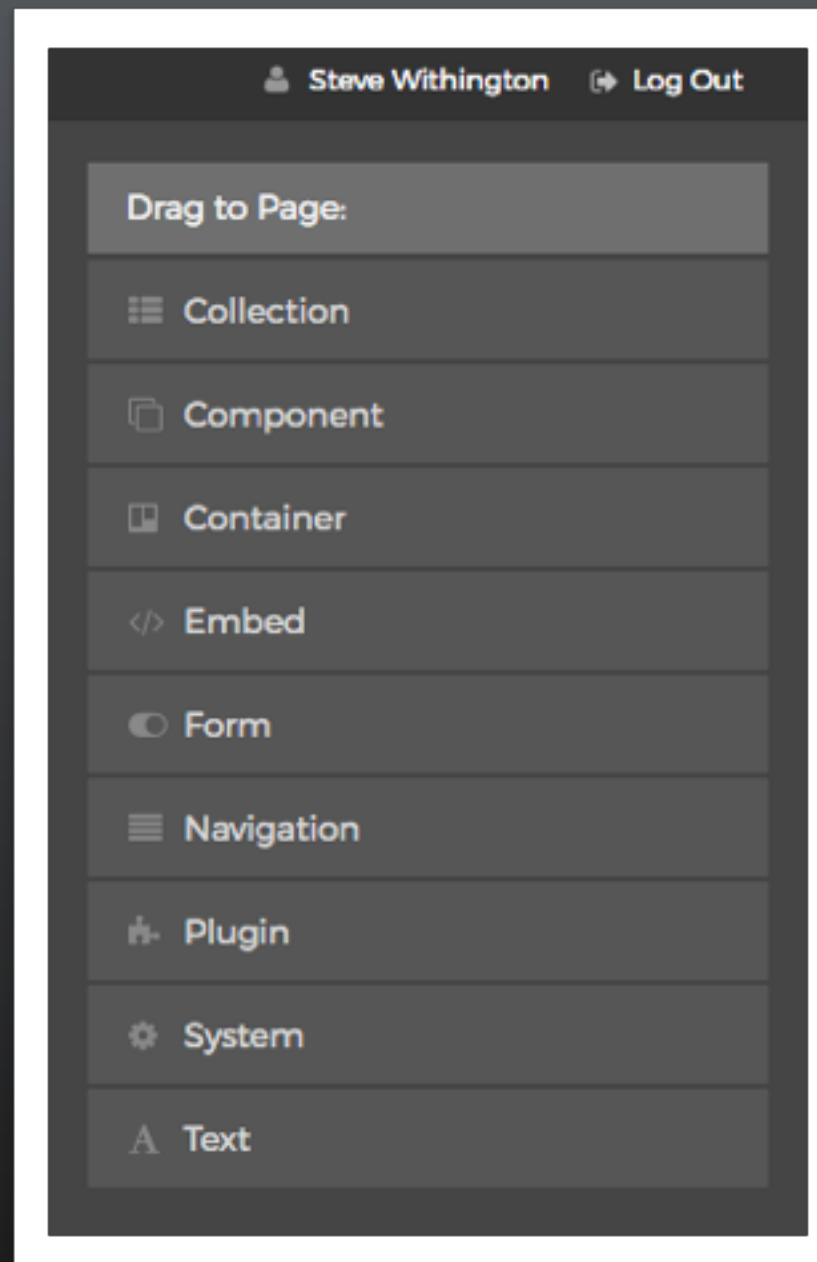

The screenshot shows the Mura CMS front-end editor interface. The top navigation bar includes the Mura logo, a 'Save' button, and various editing tools. A dropdown menu is open under 'Inline Edit', showing options like 'Full Edit' and 'Delete'. The main content area displays a 'News' section with two articles: 'Not All Wine Comes From California After All' and 'Developer Discovered Writing Code From Scratch'. The right sidebar contains 'Categories' and 'Tag Cloud' sections. A red box highlights the 'Drag to Page:' sidebar on the far right, which lists various display objects like Collection, Component, Container, Embed, Form, Navigation, Plugin, System, and Text.

Drag to Page:

- Collection
- Component
- Container
- Embed
- Form
- Navigation
- Plugin
- System
- Text
